

# Data Management & Integration (DMI) GIS

**Tim Keane, GIS Application Architect**  
**Erika Kamptner, Product Manager for GIS**

GISMO AppFair – November 20, 2019

# Current Initiatives

- Development of new hosting platform
- Enhancements to nyc-lib library
- Interagency LiDAR Workgroup

# DMI GIS in AWS

- Increase scalability of hosted applications and data services
- Provide more reliable and faster services for end users
- Simplify deployment workflows
- Increase productivity with continuous integration/continuous development

OLD WAY:

NEW WAY:

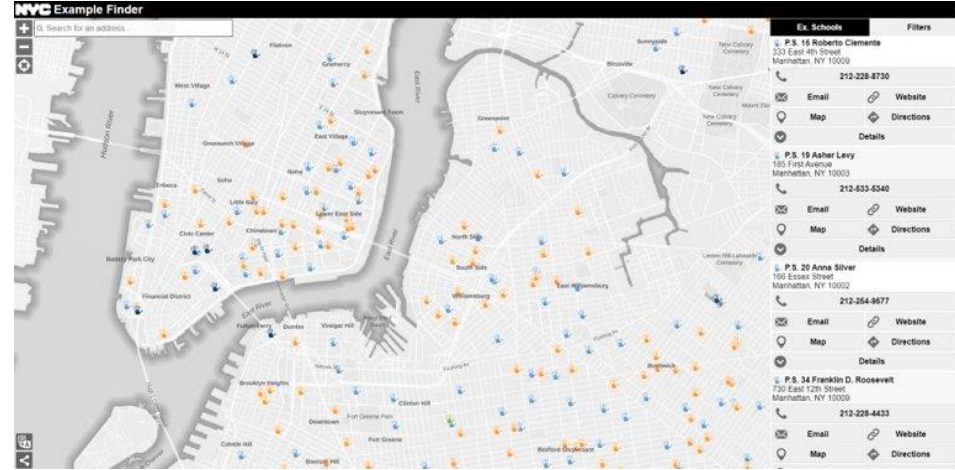

Figure 1 - from the [Mind the Product](#) blog

# nyc-lib Enhancements

- Accessibility feature improvements (with MOPD)
- Integration with NYC Core Framework

Documentation: <https://maps.nyc.gov/nyc-lib/>

Examples: <https://maps.nyc.gov/nyc-lib/v1.3.66/examples/index.html>

GitHub repo: <https://github.com/timkeane/nyc-lib>

# Interagency LiDAR Workgroup

- 10+ Agencies
- Discuss and understand cost savings to the City with gathering citywide requirements and streamlining procurement
- Workgroup will help inform future data hosting and services for agency and public use

## Future Initiatives: 2020 and beyond

- Publish new web feature services via GeoServer in EKS– a la WMTS, TMS, Vector Tiles, etc.
- 2020 Orthoimagery and update to tiling service
- Rewrite NYCityMap (oldie but a goodie)
- Remote Sensing data hosting

# Additional Resources

We updated our DoITT homepage!
